

# 1<sup>st</sup> UdS Puzzle Hunt: Timing Diagram

Timing diagram according to the SMS tracking system. The first teams to finish were *spiritus migrans*, *Thesauros*, and *Team 42*. They are highlighted in gold, silver, and bronze, respectively. *Dr.House Team* earned an honourable mention for playing without spoilers, and is visualised in green. Timeout messages are indicated by blue arrows. Please note that exercises in the initial circle are individually ordered.

## Official Report

*Team 42* has left the circle with a distinct lead, followed by a flock of 3 following teams. However, by checkpoint 5 two of the followers manage to overtake *Team 42* and stayed in the lead till the end. The winner of the game is *spiritus migrans* who managed to build up a gap of 70 minutes. *Thesauros* and *Team 42* took the silver and bronze. *Dr.House Team* came to the final location a couple of minutes after the game had ended — but supposedly without a special team member designated for eating help notes in Dudweiler (which is what the others did) and that's very good.
